LAFANTAISIE

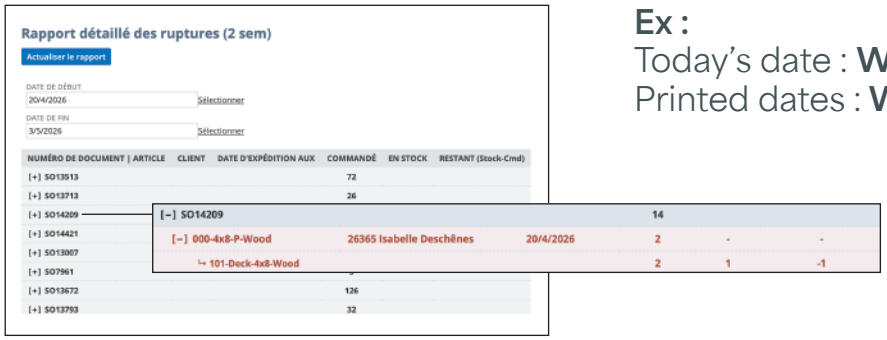
POS COORDINATEUR DES COMMANDES

Monday

Print the detailed out-of-stock report for the next two weeks.

This report compiles all orders for the upcoming two weeks and provides a complete overview of items committed to each order, as well as any missing or out-of-stock items per order.

The goal is to react ahead of time and plan the necessary replenishments by adding missing items to the next transfer order (TO), **to ensure every order is complete** before its preparation date.

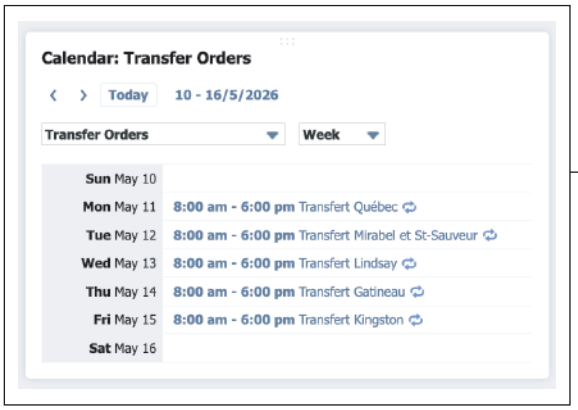


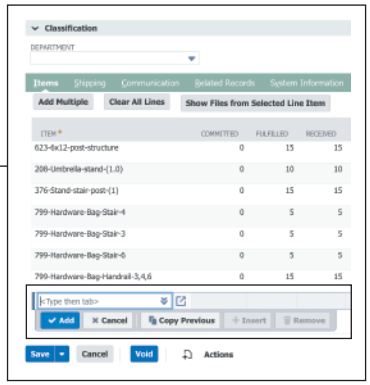
Ex :
Today's date : **Week of April 13th**
Printed dates : **Week of April 20th and 20th**

Add missing items to the existing transfer order (TO).

The transfer order (TO) is created in advance in the system by Nicolas Filion. **The director and/or fulfillment coordinator is responsible for adding all missing items** identified in the out-of-stock report.

The goal is to work within a single open file to ensure centralized tracking and prevent any item from being overlooked before the order preparation date.





Daily

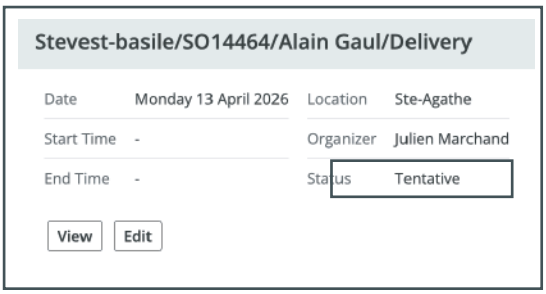
Verify that all next-day orders have a "Confirmed" status.

On the order dashboard, ensure that all orders scheduled for the following day have the status **"Confirmed"** before proceeding to printing.

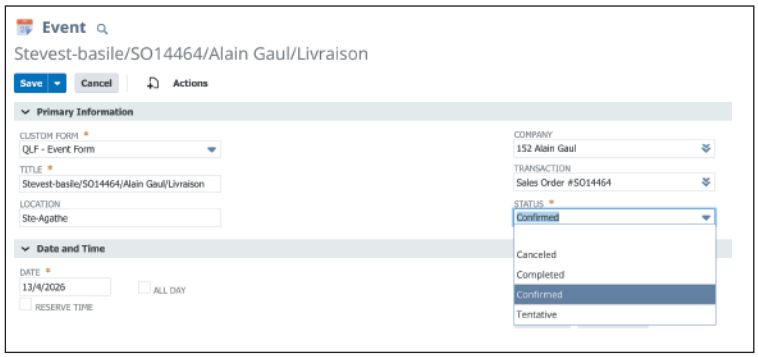
No picking list should be prepared (docks, boxes, etc.) for any order that has not been confirmed.

Follow up by phone on any unconfirmed order and manually update the status accordingly.

NetSuite Calendar



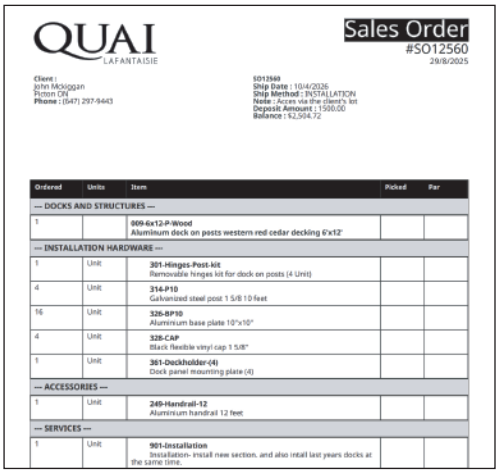
NetSuite Event



Print the next day's picking list and confirm that all items have a "Confirmed" status.

On the fulfillment coordinator's dashboard, a **custom search has been configured to automatically sort** the following day's orders (SO) and identify those that are ready to print.

24 à 48h in advance



Checklist

- **Verify order statuses**
- **Call customers for any unconfirmed next-day orders**
- **Print picking lists**
- **Prepare and label boxes with the order number (#SO). Include:**
  Hinges and brackets
  Hardware (dock bolts)
  Dock caps and post caps
- **Prepare posts and accessories and label them properly**
- **Ensure docks are ready and perform quality control:**
  Frame bolts
  Aluminum
  Deck
  Any other elements as needed
